

## EVENTS

On the 29th & 30th of January 2014, the Departments of CSE & INF conducted a two Day National level workshop on "BIG Data Analytics" under CSI-SRIT Student branch. Students from various other Engineering Colleges also participated in the workshop. Dr. P. Viswanath, Director of R&D, SRIT, Ananthapuramu, Dr. R.B.V. Subramanyam, Assoc. Prof, NIT, Warangal, Dr. V.Suresh, Research Fellow, City University London, UK, and Dr. T.Hitendra Sarma, Head of CSE&INF, SRIT, Ananthapuramu were the speakers for the workshop.

The departments of CSE & INF organized "A Two day national level workshop on Android Applications Development" on the 15<sup>th</sup> and 16<sup>th</sup> of March 2014 in collaboration with Tech Embark, Bengaluru in association with 'Computer Society of India' Student chapter. A total of 150 students from various Engineering colleges in and around Ananthapuramu actively participated in this workshop. The training and hands on practice were looked after by the team headed by Mr. Sagar from Tech Embark.

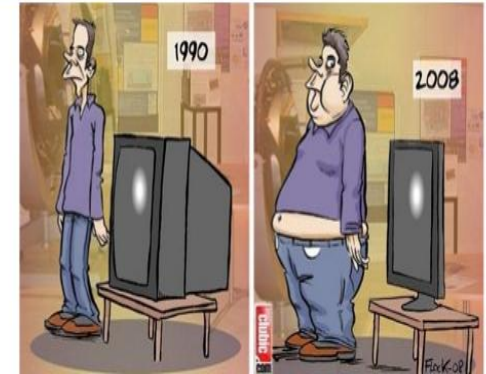

Four of our CSE & IT students were selected in the Tech-Mahindra campus drive held on 25<sup>th</sup> March in SRIT.

### Trends in Technology- Past, Present and Future

Technology is an evolution and is one of the most often used words in present scenario. The life of a modern man is perfect and full of spark only with the assistance of technology. It starts with taking a shower of hot water in the morning and ends with sleeping in a cool A.C room. If we imagine life without technology, it might look exactly as that of the life of an early man. By this, one can say technology as a process of growth. It goes on and on. The life of humans is varying from one centenary to other and all the credit goes to technology. The "So called" miracles in the past are possible in the

present, just because of technology. No man of 10<sup>th</sup> centenary could have imagined about walking on the moon, a human robot, smart phones, Google glasses and many more..... I presume that the people of 21<sup>st</sup> century are blessed with modern tools. We can be educated, entertained and shopped with just a click.

### How TECHNOLOGY has affected our lives?

Technology gives a consciousness of being in bed of roses, but at the same time it has the thorns too.

Thorns like, making the people meet and communicate 'only from distances' and the people become lazy. In one word, I will say technology "Isolates" people. Trends of technology can be better understood by looking at the example of "Technology in Education". In past days there is no kin between education and technology. In the present scenario, almost every student uses technology by hook or by crook. Professors teach the students by using projectors, the students complete their assignments with the so called

boon named as "Internet".

The future generation students might only carry digital books, laptops and tablets in their bags.

Finally, we can say that technology makes life easier, it saves time, it provides information, and it brings awareness. Today, our society is driven by technology and it is an addiction to modern generation. I firmly believe technology is purchased more as a fashion statement.
